PROFILE

A technology enthusiast with hands-on experience in Data Analytics projects and a strong proficiency in Python, Power BI and SQL. I excel in untangling the intricacies of the data lifecycle. As a quick learner with a creative edge, I take pride in devising unique solutions and communicating clearly. My commitment extends to ensuring effective data management with a personalized touch.

EMPLOYMENT HISTORY

Data Analyst at Freelance

January 2023

- Collaborated with diverse clients to understand and address their unique data analysis needs.
- Utilized Power BI and SQL to process and validate data, ensuring accuracy and reliability.
- Developed and implemented customized analytical frameworks, providing actionable insights for informed decision-making.

DATA ANALYST at Quantum Analytics

July 2022 — November 2022

- Utilized Power BI and Tableau to manage end-to-end data lifecycle, including the collection, cleaning, and modeling of complex datasets, catering to management and customer requests.
- Led the loading, extraction, and validation of client data, ensuring precision and accuracy through proficiency in SQL.
- Applied advanced analytical techniques independently, leveraging Power BI and Tableau for insightful visualizations and comprehensive reports that drove strategic decision-making.
- Demonstrated adaptability in retrieving data from various databases using SQL, showcasing versatility in handling diverse data sources.
- Performed daily system checks, utilizing SQL to maintain data integrity and ensure a reliable data environment.
- Conducted meticulous data audits, and generated comprehensive reports, providing stakeholders with actionable insights.
- Provided valuable insights on the suitability of methodologies, consistently suggesting improvements for enhanced data analysis processes, often involving SQL optimizations.
- Implemented data processing and statistical techniques, contributing to robust analytical frameworks using SQL.
- Communicated qualitative and quantitative analyses to internal and external stakeholders, facilitating informed decision-making through Power BI and Tableau presentations.

EDUCATION & CERTIFICATIONS

Power BI Data Analyst Associate, Microsoft Certified

June 2023

Doctor of Veterinary Medicine, Michael Okpala University of Agriculture

TECH TRAINING

Python - Zero To Mastery

March 2023 — Present
